Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I need an accurate way to evaluate a country's Human Development Index." • "Manual HDI calculations take too much time." • "I want reliable predictions for better policy decisions."	THINKS • Health, education, and income all affect human development. • Machine Learning could simplify HDI prediction. • A fast prediction system would improve decision-making.
PERSONA NAME <i>Government Policy Maker / Research Analyst</i>	
DOES • Collects socio-economic data from different sources. • Compares HDI values across countries. • Uses prediction results to support planning and research.	• Frustrated with manual calculations and large datasets. • Confident when accurate predictions are available. • Satisfied with quick, easy-to-understand results.
