

Project Demo Planning

Date	4 July 2026
Team ID	xxxxxxx
Project Name	HDI Prediction System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the importance of HDI and define the problem statement.	2	Santosh
2	Dataset & Solution Overview	Explain the dataset, input features (Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, GNI per Capita) and the machine learning approach.	3	Jagadesh
3	Live Feature Demonstration	Demonstrate data input, HDI prediction, and display of the predicted HDI category.	4	Varshit
4	Results & Performance	Present model accuracy, evaluation metrics, graphs, and sample predictions.	2	Varshit
5	Future Scope & Conclusion	Discuss future improvements, real-world applications, and summarize the project.	2	Praveen Ram
6	Question & Answer Session	Respond to questions from faculty and evaluators.	2	All Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain what HDI is, why prediction is useful, and state the project objectives.
2	Solution Overview	Describe the dataset, preprocessing, selected features, and machine learning model.
3	Live Feature Demonstration	Enter sample values, predict the HDI category, and explain the output.
4	Q&A Session	Answer faculty questions, explain model performance, and discuss future enhancements.
