| <b>Date</b>          | 15 March 2026                         |
| <b>Team ID</b>       | XXXXXX                                |
| <b>Project Name</b>  | A Comprehensive Measure of Well-Being |
| <b>Maximum Marks</b> | 1 Mark                                |

### Demonstration of Proposed Features:

This document captures all the features proposed during the planning and development of **A Comprehensive Measure of Well-Being**. It records whether each feature has been successfully implemented and demonstrated, serving as evidence of the project's successful completion.

| S.No | Feature Name                | Description                                                                                                      | Status<br>(Implemented /<br>Partial / Pending) | Demonstrated<br>(Yes / No) | Remarks                           |
|------|-----------------------------|------------------------------------------------------------------------------------------------------------------|------------------------------------------------|----------------------------|-----------------------------------|
| 1    | User Input Interface        | Accepts Life Expectancy, Expected Years of Education, Mean Years of Education, and GNI per Capita from the user. | Implemented                                    | Yes                        | Working successfully              |
| 2    | Input Validation            | Validates user input before prediction.                                                                          | Implemented                                    | Yes                        | Invalid inputs are handled        |
| 3    | HDI Prediction Model        | Predicts the Human Development Index using the trained Linear Regression model.                                  | Implemented                                    | Yes                        | Accurate prediction generated     |
| 4    | HDI Category Classification | Classifies the predicted HDI into Very High, High, Medium, or Low Human Development.                             | Implemented                                    | Yes                        | Category displayed correctly      |
| 5    | Result Display              | Displays the predicted HDI score and category on the result page.                                                | Implemented                                    | Yes                        | Output shown successfully         |
| 6    | Flask Web Application       | Integrates frontend, backend, and ML model into a complete web application.                                      | Implemented                                    | Yes                        | End-to-end functionality verified |

### Feature Implementation Summary:

| Item                                   | Value       |
|----------------------------------------|-------------|
| <b>Total Features Proposed</b>         | <b>6</b>    |
| <b>Total Features Implemented</b>      | <b>6</b>    |
| <b>Total Features Demonstrated</b>     | <b>6</b>    |
| <b>Overall Implementation Rate (%)</b> | <b>100%</b> |
